DESCRIPTION

The Voyager 61 responds to the desire to sail further and not spend too much time travelling between two destinations," says Bart Van den Hoven, general manager of the shipyard. "With a top speed of 22.5 knots, owners will be able to sail longer distances in less time, while enjoying all the qualities of Van den Hoven; space on board, finish, comfort and performance. Built in aluminium, it gives an impression of freedom, especially in the layout of the interior. The Voyager 61 was designed in collaboration with the renowned Dutch superyacht designer René van der Velden. While respecting Van den Hoven's own DNA, René has created a timeless design, outside of fashion, in the spirit of superyacht charisma and luxury. This large deck seats eight people and has sunbeds for added comfort, an outdoor kitchen with grill, sink and fridge. A bimini is available as an option. The large aft deck is also a very pleasant place to be, offering a shaded area for quiet dining. The foredeck offers a luxurious sundeck, the perfect place for an evening cocktail and to imagine what tomorrow will bring.
