Description

wallypower58Xnew Building on the revolutionary wallypower58 platform, with its striking glass and carbon dome, the wallypower58X introduces a range of new features adapted for outboard propulsion.It is the first Wally yacht to be fitted with the new 600hp Mercury V12 Verado – or rather, a powerful configuration of four of them. With 2,400hp on the transom, the stable and efficient deep V-hull can reach an exhilarating 50 knots. And yet fuel consumption remains low, while the boat's additional tankage gives it a range of 300 nautical miles.Performance is therefore a given, but Wally has also exploited other capabilities offered by the new Mercurys. They have a reduced draft compared to other models, making the boat suitable for shallow water
